

PROOF OF CONCEPT REQUIREMENTS

Focus Brain Therapy

May 6, 2026

New Customer Website Rebuild

Existing Client website: <https://focusbraintherapy.com/>

Document purpose

The purpose of this document is to provide specific requirements to deliver a static Proof of Concept/Mockup for a rebuild of the client's existing website. The concept needs to be professionally designed that represents the proposed look and structure of the new site.

The Proof of Concept will:

- Establish the overall design style, including colors, fonts, imagery, and branding elements.
- Show the layout and organization of content (navigation, sections, **calls-to-action**, footer, etc.)
- Demonstrate the visual placement of features such as forms, buttons, and images
- Ensure alignment on design direction before coding and development begin
- The Proof of Concept is **not a functional website**.
 - It is a static, non-interactive visual representation only.
 - Links will not work, forms will not submit, and no backend functionality will be active at this stage.
- Its purpose is to confirm the design direction and receive approval prior to development. Once approved, the build phase will begin based on the agreed-upon design.
- Creating and approving the Proof of Concept helps prevent mis-understandings, reduces revisions during development, and ensures the final website reflects the client's vision.

This document helps identify high level requirements for the new website and helps the Think Big Website team understand what "Focus Brain Therapy" does, who their target audience is, their goals and any specifics they have for a new website.

Scope

Focus Brain Therapy is a potential new client that requires a Proof of Concept/Mockup to proceed with Think Big Websites building a new custom website rebuild.

They specialize in targeted assessment, diagnosis, treatment and rehabilitation of neurological conditions affecting cognitive, emotional, and physical function for patients with:

- Concussions/mild traumatic brain injuries
- Mild Cognitive Impairment of early stage dementia
- Cognitive, emotional or psychological systems related to injury or disease
- Vestibular (sensory system in the inner ear and brain that controls balance
- Memory, focus and decision-making training
- Stroke and pos-concussion recovery

Website Basic Requirements

- Being one of a kind
- Mobile Friendly
- Modern and professional
- Smooth flow
- Attention grabbing, and stimulating looks and feel.
- Wants site to focus on their facility, services, and benefits
- Really **strong emotional** CTA (Call to actions) such as but not limited to the following and answering questions like:
 - What should a person do when they look at the website?
 - Why do we do what we do?
 - Who we are?
 - Who are our patients?
 - What are our services?
 - Where do we provide services?
 - How do we provide services and support?
 - Click to call.
 - Do you worry about getting Dementia and Memory Loss?

Company Overview

What are the main products or services your company offers?	Neurological evaluations, diagnostic testing and physical therapy
Who is your key audience/customers and who needs to look at your website?	Sports accidents, elderly patients (dementia), stroke and post-concussion patients.

New Website

Colors of website	Need to capture the video that is on their existing site now, on/for the concept. Their studio/office has all of the colors and we need to make the website match the video.
Company Logo	Use the one on the existing website.
Brochures, Flyers, Ad examples	See attached flyers for ideas on photos, images to change or add to the new website.
Detail any compliance or certifications, awards	<i>Pending from client.</i>

Existing Website

Existing website?	https://focusbraintherapy.com/
What is the purpose of your website	To generate business, leads and new revenue. They are insurance and Medicare based.
What challenges are having with your existing website	Needs to be attention grabbing and a website that let's people know they can help

Other Website information:

- A contact us form will be used on the website
- The website will not sell products or services
- Social Media Links – they don't any now but are interested in having Think Big assist
- Do not use the "pill bottle" image seen on flyers they do not prescribe medications
- They don't just focus on injuries but all "Maintenance" for the brain
- Don't show doctor Rielo on mockup/website he is no longer with the practice.
- Alyssa's last name is misspelled. Her name is Alyssa Villalba
